

PV Powered Solar Attic Fans

Calculate your savings with the new improved SoladVent PV Powered Attic Fans. Reduce your air conditioning bills using free energy from the sun!

Remove up to 2,295m³ of hot air every hour and moist air from your roof in winter. Thermostat supplied as standard.

Also available in Aluminium body for Australian coastal regions

Real energy savings for your Coastal or Inland household (Heavy Duty, Long Life Construction)

All over the world, close to 40% of total residential power usage can be attributed to heating and cooling. By cooling the ceiling in summer and reducing damp and moist air in winter, Millionsun can improve the comfort of your home and its indoor air quality. Where homes have air conditioning installed, Millionsun can save hundreds of dollars each year by improving the efficiency of your air conditioning system.

Millionsun Model MS-SAF20W PV attic fans will quietly and efficiently cool and dry your attic whenever there is sun.

With a 6-12V brushless DC motor for long life, the MS-SAF20W range of attic fans reduces energy costs by:

1. Reducing the need to run costly air-conditioners and ceiling fans in hot conditions;
2. Increases efficiency of ducted air-conditioning systems reducing energy costs;
3. Energy for exhaust DC motor is free from the sun; no additional power is required

PRODUCT SPECIFICATIONS

Model Numbers	MS-SAF20W
Cooling Capacity (Area)	Up to 120 Square Metres
PV Panel (W)	20W/18V 1.11A
Size (mm)	530x530x250mm
Weight (kG)	16.5
Fan Blade Material	Steel with UV coating
Vent Opening (mm)	368
Motor Type	6-21V DC (Brushless) – No wiring Required, Long Life
Thermostat Operating Temperature	28°C Thermostat: On: 28°C +/- 3°C; Off: 21°C +/- 3°C
Exhaust Capacity (M ³ /Hour)	2,295 CMH

Warranty 15 Years PV Panel, 5 Years Motor, 1 year labour
